- Do not use a broken or damaged product.
- If nasal symptoms prevail beyond 5 days, consult a healthcare professional.
- Keep out of reach and sight of children.

### INGREDIENTS

100% natural, undiluted and hypertonic seawater solution (equivalent to 22 g/l of total mineral salts). Sterile and preservative free. Gas propellant free.

### HOW TO USE

#### Recommended use

- For nasal congestion due to cold, rhinitis and rhinopharyngitis: 2 to 3 times a day, a 1 to 2 seconds spray in each nostril.

#### Administration mode

It is recommended to proceed nasal wash before feeding, when the child is awake and calm.

Lay the baby down on a slightly inclined bed (30°) with his/her head to one side (never backwards to avoid the risk of wrong way into the throat). Spray some of the solution on your hand to check that the temperature is correct and get used to the pressure it delivers. You can also spray on baby's hand to reassure him/her.

Before use: check if the spray works properly.

- 1 - Gently insert the nozzle in the upper nostril and press the nozzle once firmly for 1-2 seconds. Let the solution act for a few seconds.
- 2 - Repeat with the other nostril.
- 3 - Lift baby back up and wipe his/her nose or use a nasal aspirator device.

Wash the nozzle with hot water after each use and dry properly.
